MEDIBENDER

A bending instrument for Mediplast Single Use
Metal Suction Tips:
2,0 mm - 1,4 mm - 1,0 mm diameters

- Stainless Steel
- Non sterile
- Can be autoclaved

How to use it:

1. Grip the instrument with the thumb on the Mediplast engraving and with the holes visible.
2. Take the wanted size of metal suction tip.
3. Put the metal suction tip through the appropriate sized hole:
left = 2,0mm , middle = 1,4mm , right = 1,0mm diameters
4. Bend the metal suction tip gently in the length direction of the instrument to the angle wanted.

Art No

6066500

ward box/trsp. box

ELASTIC FIXATION BANDAGES

MEDIPLAST® can offer **Danamull** and **Danalast** elastic fixation bandages. Supporting fit over limbs and wound bandaged areas. The bandages are blood and salves resistant, and have good aeration. Autoclaveable. Latex free.

DANAMULL:

Double weaving with woven edges
70% Viscose, 30% Polyamide
Elasticity: 100%

PACKING:

Ward box: coated card board of recycled/new fibre mix.
Trsp box: unbleached card board of recycled/new fibre mix.

Article No	Description	Pcs/ ward box	Pcs/ trsp.box
6050601	4 cm x 4 meters	20	1440
6050602	6 cm x 4 meters	20	960
6050603	8 cm x 4 meters	20	720
6050604	10 cm x 4 meters	20	600
6050605	12 cm x 4 meters	20	480

DANALAST:

Single weaving
60% Polyamide, 40% Viscose
Elasticity: 100%

Article No	Description	Pcs/ ward box	Pcs/ trsp.box
6050501	4 cm x 4 meters	20	1440
6050502	6 cm x 4 meters	20	960

MIXING SETS

- A closed system for preparation and administration of antibiotics and chemotherapy drugs
- Simple and safe to use
- Will make the drug handling safer. The mixing sets prevent spilling and unnecessary exposure
- Hydrophobic filter on the protection cap eliminates risk for leakage and contamination of the luer-lock connection
- Rotating luer-lock on all models

For mixing of dry substances and transfer of solution from ampoule to infusion bag with a closed procedure

*60MR03508357C
For preparation of stem solutions, will also give the possibility to adapt dose volume*

INFUSION SET - SPECIAL

Infusion set with integrated back check valve in the luer-lock connector

- Used in parallell infusions
- Helps to make infusion therapy safer and easier
- Prohibits back flow. Closes automatically by back pressure
- No risk for infusion solutions/drugs to be mixed
- Gives steady infusion flow rate
- Reduces risk for stop in cannulas/catheters

Art no	Ward box/Trsp box

60MP150PE 150cm, priming volume 1,2ml, MF

60MP200PE 200cm, priming volume 1,6ml, MF

Ward box/10 pcs Trsp box/50 pcs

All products are single packed in peel-pack

Trsp box = min qty/order

Sterilization method: ETO

ISO 8536-4 and 8536-12 EN 980

Luer EN 20594-1

MDD Rule: Rule 2

MDD Class: IIa

CE: according to existing directive

INFUSION ACCESSORIES

Transfer spike

- Transfer spike for all types of Infusion/additive bottles
- Single use, sterile single packed in peel pack

Art no	Description	Ward box / trsp box
60MP04000380	Transfer spike	30/450

Material: ABS

Infusion filter

Applicable for Taxol- and/or Remicade-infusions

- PVC-free, 0,2 my with 20 cm tube
- Back check valve
- Single use, sterile single packed in peel pack

Art no	Description	Ward box / trsp box
60MP04100168	Infusion filter with back check valve	10/100
60MR04100168	Infusion filter	10/100

Materials:

Filter membrane: Polysulphone, Filter house: acrylic, LuerLock: ABS, tubing: Polyefine, Back check valve: Silicone

Trsp box = min order qty

Sterilization: EO
ISO 8536-4 and 8536-12 EN 980

MDD Rule: Rule 2
MDD Class: IIa
CE: Acc to excisting directives

TRANSFUSION SETS

- Extra large filter area, 16,3 cm²
Gives an effective filtration and allows a high transfusion-flow rate
- Available in different tube lengths
- PVC or PVC-Free material
- Protection cap with hydrophobic filter simplifies filling of sets and reduces contamination risk
- All models with rotating luer-lock
- Available with 3-way stopcock

Transfusion sets

Art no	Description	Ward box/Trsp box 10/100
60MR60500200	180 cm inf set	
60MR60500300	180 cm inf set, two spikes	
60MR60500210	220 cm inf set	
60MR60500201	320 cm inf set

MEDIFUSOR - PRESSURE CUFF

For infusion and transfusion therapy where it is important with constant high flow rate, I e in the ER, ICU and OR's typically.

- Available in Nylon coated PU (Polyurethane) which fits both 500 ml and 1000 ml infusion bags.
- Also available in transparent PU which also fits for 500ml resp. 1000 ml infusion bags. The transparent version simplifies control of fluid level in the bag.

Art. No	Description	Ward box/Trsp. box
604805	Grey nylon 500-1000 ml	1/1
604807	Transparent 500 ml	1/1
604810	Transparent 1000 ml	1/1
Spare part		
604811	Pump with 3-v valve fits all pressure cuffs above	1/1

Material:
 Art No 604805 Nylon coated PU
 Art No 604807 Transparent PU
 Art No 604810 Transparent PU
 Tubes and pump in PVC

MDD Class: I
 CE: Acc to existing directives

SUCTION TUBING

- A wide assortment of PVC and PVC free tubes
- Supple, resistant to folding and durable under vacuum pressure
- Available in 3 different packs:
 - Suction Tube Sterile - double packed in peel pack
 - Suction Tube Hygienical – hygienically packed in peel pack
 - Suction Tube on Roll – hygienically packed on roll

Material: PVC
PVC free: XS119
MDD Rule: Rule 2
MDD Class: I, Is
CE: Acc. to existing directives

SUCTION CATHETERS

TYPE MÜLLY

STRAIGHT, COUDÉ (ANGLED TIP)

AND WITH VACUUM CONTROL

- Colour coded connections for easy identification CH size
- Coudé catheter enables choice of direction for left or right bronchi. Used for drainage of bronchi
- Suction catheter with vacuum control gives an atraumatic suction treatment and enables finger tip control and intermittent suction technique
- Catheter lengths straight – 25 cm, 40 cm, 53 cm
- Catheter length coudé (angled) – 53 cm
- Catheter length for suction catheter with vacuum control – 35 cm for models with cm graduation and 53 cm for models without cm graduation
- Material: Medical Grade PVC / PVC-free
- ETO sterilised

TUBE GUARD

BITE BLOCK FIXATION OF ET-TUBES

- Safe, hygienic and easy to use
- Easily squeezed onto the ET tube
- Occupies minimum space in the mouth
- No force on the tongue back and down
- Patient friendly
- Simplifies the mouth hygiene routine
- No risk for the cuff tube to be squeezed thanks to the unique design
- Made of Polypropylene
- Latexfree

TubeGuard – unique fixation and bite block for ET-tubes

Art no	Size	Ward box/Trsp box
601060	Fits ET-tube 6 and 6,5	50/1200
601070	Fits ET-tube 7, 7,5 and 8	50/1200

MEDIPLAST® AVLOX SYSTEM

The Avlox® System is used to close all standard incisions in the chest, abdomen, neck and limbs

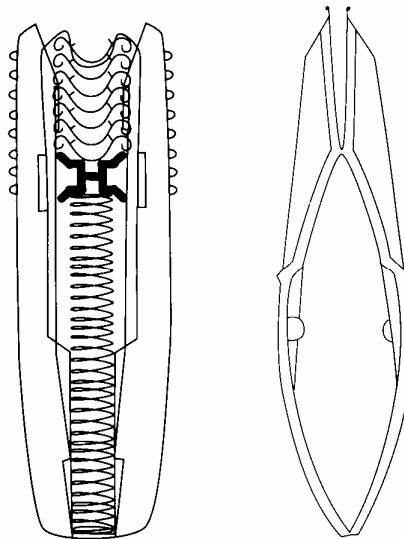

- The Mediplast® Avlox System is a "gold standard" to use in thyroidectomy operations
- The system is non-traumatic and time saving
- The speed of application reduces operating time
- The sterile disposable format requires a minimum of preparation both for application and removal
- Scarring is reduced to a minimum
- Easy clip removal with minimal patient discomfort
- The clips are made of medical grade stainless steel and kept sterile in the applicator
- The material is polycarbonate and stainless steel medical grade

Mediplast Remover®

Instrument for removal of the clips.

Material: Blue polycarbonate – harmless to the environment

GLOVES

Medi plast is part of Procurator AB, a Swedish group of companies with focus on personal protection equipment, medical technical products and office and paper supplies. The group has around 300 employees and a total turnover of approx. 110 MEUR

Gloves for personal protection is the biggest product group in the Procurator Group, our yearly turnover in this product group is approx. 25 MEUR/Year and growing.

In the assortment today we have approx. 470 different models of gloves, of which 86 are of our own brand – 14 of these are single use gloves.

Medi plast sells these types of gloves to the healthcare and on export, Procurator sells the gloves suited for industry and trade in Scandinavia.
